SELL

30-page practical ebook

Images, worksheets, examples, prompts, launch plans, and checklists.

02 Big Promise

The buyer does not want more information. The buyer wants a shorter path to a specific result. For AI freelancers and consultants, the target is business owners needing AI help: people with custom proposals and unpredictable income who can understand the value of a repeatable AI service ladder quickly.

1

Make it specific

Name the buyer, the painful task, and the result. A repeatable AI service ladder sells better when the promise is narrow.

2

Show proof

Use screenshots, sample pages, before/after examples, demos, and clear instructions so buyers trust the offer.

Proof

Launch

Improve

Builder notes

- Buyer: business owners needing AI help
- Pain: custom proposals and unpredictable income
- Product: repeatable AI service ladder
- Proof: screenshot, sample, demo, or case study

Do this next

- Action: write the one-sentence offer.
- Action: create one proof asset today.
- Action: ask five buyers what they use now.
- Action: improve the page using objections.

Quick prompt

Create a practical offer for business owners needing AI help that solves custom proposals and unpredictable income using a repeatable AI service ladder. Include buyer, promise, proof, price, and first launch step.

03 Market Map

Start with a buyer, a repeated pain, and a result that is easy to understand. For AI freelancers and consultants, the target is business owners needing AI help: people with custom proposals and unpredictable income who can understand the value of a repeatable AI service ladder quickly.

Idea scoring matrix

Builder notes

- Buyer: business owners needing AI help
- Pain: custom proposals and unpredictable income
- Product: repeatable AI service ladder
- Proof: screenshot, sample, demo, or case study

Do this next

- Action: write the one-sentence offer.
- Action: create one proof asset today.
- Action: ask five buyers what they use now.
- Action: improve the page using objections.

Quick prompt

Create a practical offer for business owners needing AI help that solves custom proposals and unpredictable income using a repeatable AI service ladder. Include buyer, promise, proof, price, and first launch step.

04 Buyer Snapshot

A specific buyer makes the product easier to write, price, explain, and sell. For AI freelancers and consultants, the target is business owners needing AI help: people with custom proposals and unpredictable income who can understand the value of a repeatable AI service ladder quickly.

- Action: improve the page using objections.

Quick prompt

Create a practical offer for business owners needing AI help that solves custom proposals and unpredictable income using a repeatable AI service ladder. Include buyer, promise, proof, price, and first launch step.

09 Workflow Blueprint

The product should move the buyer from messy input to useful output with as little friction as possible. For AI freelancers and consultants, the target is business owners needing AI help: people with custom proposals and unpredictable income who can understand the value of a repeatable AI service ladder quickly.

Workflow blueprint

Builder notes

- Buyer: business owners needing AI help
- Pain: custom proposals and unpredictable income
- Product: repeatable AI service ladder
- Proof: screenshot, sample, demo, or case study

Do this next

- Action: write the one-sentence offer.
- Action: create one proof asset today.
- Action: ask five buyers what they use now.
- Action: improve the page using objections.

Quick prompt

Create a practical offer for business owners needing AI help that solves custom proposals and unpredictable income using a repeatable AI service ladder. Include buyer, promise, proof, price, and first launch step.

10 AI Use Cases

Use AI for drafts, summaries, classification, extraction, personalization, and decision support. For AI freelancers and consultants, the target is business owners needing AI help: people with custom proposals and unpredictable income who can understand the value of a repeatable AI service ladder quickly.

Workflow blueprint

Builder notes

- Buyer: business owners needing AI help
- Pain: custom proposals and unpredictable income
- Product: repeatable AI service ladder
- Proof: screenshot, sample, demo, or case study

Do this next

- Action: write the one-sentence offer.
- Action: create one proof asset today.
- Action: ask five buyers what they use now.
- Action: improve the page using objections.

Quick prompt

Create a practical offer for business owners needing AI help that solves custom proposals and unpredictable income using a repeatable AI service ladder. Include buyer, promise, proof, price, and first launch step.

11 Validation Plan

Do not ask if the idea is cool. Find out whether the problem is real and whether buyers will take action. For AI freelancers and consultants, the target is business owners needing AI help: people with custom proposals and unpredictable income who can understand the value of a repeatable AI service ladder quickly.

Idea scoring matrix

Builder notes

- Buyer: business owners needing AI help
- Pain: custom proposals and unpredictable income
- Product: repeatable AI service ladder
- Proof: screenshot, sample, demo, or case study

Do this next

- Action: write the one-sentence offer.
- Action: create one proof asset today.
- Action: ask five buyers what they use now.
- Action: improve the page using objections.

Quick prompt

Create a practical offer for business owners needing AI help that solves custom proposals and unpredictable income using a repeatable AI service ladder. Include buyer, promise, proof, price, and first launch step.

12 Interview Questions

Good validation questions reveal current behavior, cost of the pain, and existing alternatives. For AI freelancers and consultants, the target is business owners needing AI help: people with custom proposals and unpredictable income who can understand the value of a repeatable AI service ladder quickly.

1

Make it specific

Name the buyer, the painful task, and the result. A repeatable AI service ladder sells better when the promise is narrow.

2

Show proof

Use screenshots, sample pages, before/after examples, demos, and clear instructions so buyers trust the offer.
